Master's student in Embedded Systems with hands-on experience in robotics, real-time systems, and low-level development. Strong background in C/C++, Python, and embedded Linux, with practical exposure to multi-agent simulation and reinforcement learning. Currently seeking a 6-month internship to apply and deepen these skills in a professional environment.

Skills

Programming Languages

- Python, C, C++, Go, Ada, Java, Shell scripting

Embedded & Systems Development

- Microcontrollers & IoT: Raspberry Pi, Arduino, BeagleBone
- Embedded Linux and RTOS programming basics, FPGA fundamentals

Software Engineering & Architecture

- Distributed systems & concurrency (Go routines, CSP, synchronization)
- Secure software development & vulnerability detection

Robotics, AI & Computational Methods

- AI for embedded systems (FPGA co-design, CNN deployment)
- Task allocation & Algorithms (Hungarian, Q-learning, fuzzy logic, genetic, Lamport clocks)

Experience

04/2025 - 06/2025

Intern

Lab-STICC & University of Western Brittany, Brest, France

- Researched and implemented task allocation strategies for multi-robot systems in simulation using Python and CoppeliaSim.
- Explored both learning-based (Q-learning) and optimization-based (Hungarian algorithm) approaches for distributed coordination.

04/2024 - 06/2024

Intern

Yvon SALAUN, Brest, France

- Designed and developed a custom showcase website and internal administration platform from scratch using PHP and JS.

05/2022 - 06/2022

Intern

Cyllene, Plerin, France

- Developed a custom margin sheet management tool using PHP and MySQL tailored to the company's internal workflow
